RPA (UIPath)

Flutter & Dart

Jia Hong

FULL STACK DEVELOPER

I am passionate about building websites that are easy to use with good user experience in mind. During my free time, I like to watch videos about new frameworks like Nextjs, React, Tailwind and many more. I graduated from Nanyang Polytechnic in the Diploma of Infocom & Media Engineering. I am glad to be part of the WorldSkills team for Web technologies trade. Nanyang Polytechnic has equipped me with basic automation skills (RPA), Software testing and Security, Web Development, API development and many more.

Projects

Hotel Website

Jun 2024 - August 2024

Developed a basic Hotel Website using Html, CSS, jQuery, php and phpMyAdmin. It allows users to book and cancel a room. View the available rooms. Login and Signup with an account. Update their personal information.

Snake Game

Jun 2024 - August 2024

Developed and designed a zombie theme snake game where users play as the zombie. Users would eat humans to gain points in the game. They can also check their score in the leaderboard section. This game is built in C#

Portfolio Website

Jun 2024 - August 2024

Developed a front-end portfolio website using Vue.js and Typescript. It was designed to have a minimalist design and layout. It is also built to be responsive.
